

PUNCH Powerglide's partnership with Jiangxi Isuzu Engine: First vehicles with joint “PowerPack” now on the Chinese market

09th January 2019

Since September 2017, PUNCH Powerglide and Jiangxi Isuzu Engine, a successful joint venture between ISUZU and Jiangling Motors, have been partners. The two partners are proud to announce that the production of the ready-to-use “PowerPack” has now started. The two first applications on the market are the latest ZX Auto and SG Huanghai Pickups, now available with PUNCH Powerglide’s automatic transmission.

The “PowerPack” includes the assembly of a transmission with a diesel engine, ready to use, suitable for a wide range of vehicle applications, including low volumes. This turnkey solution is therefore an excellent alternative in terms of time and budget savings.

The start of production of this joint “PowerPack” shows the importance and success of this partnership. Through this type of partnership, PUNCH Powerglide demonstrates its willingness and ability to develop its role as a strategic partner for Chinese car manufacturers.
