

Launch of the Mahindra Roxor equipped with a 6L50 produced by PUNCH Powerglide

June 27th 2019

Mahindra North America has launched the commercialization of its off-road vehicle, Roxor, equipped with a 2.5-litre Turbo Diesel engine. It is now also available in automatic version with a 6L50 gearbox from PUNCH Powerglide. Built on a steel chassis and body, Roxor offers unique off-road driving experiences, combining robustness and innovation, this vehicle guarantees constant performance under all driving conditions. The automatic gearbox allows the driver to focus all his attention on his driving, even under extreme conditions.

"The robustness of the 6L50, already produced more than 2.2 million times in Strasbourg, was certainly a decisive factor in our customer's choice," says Oliver Nass, Sales & Marketing Director at PUNCH Powerglide.
